Our Mission
Wells Bring Hope addresses the most basic of human needs—safe water—and does so in Niger, West Africa, the poorest country in the world where 1 out of 7 children dies from contaminated water before their 5th birthday.

The Impact
After a well is drilled, child mortality drops by 70+%. Women and girls, no longer walk 4-6 miles every day, which means girls can go to school and women can work and earn money.

How We Work
100% of every donation goes directly to drilling wells. All of our wells are fully sustainable because of our well maintenance training program. We also train women to start their own small businesses.

The Results
In 10 years, we funded 500 wells, transforming the lives of over ½ million people, most of them children.

Our Goal
350 more wells by 2023.

Partnerships for a Better World

How You Can Help

Direct Corporate Gift
Corporate giving can take many forms: an on-going annual gift, percentage give back, and point-of-sale roundup. Some of our partners opt to contribute to operating expenses or event underwriting.

Workplace Giving
You can build staff morale and loyalty through a workplace giving campaign. It’s a way to celebrate the generosity of your team while making an immediate positive impact for those in dire need of help.

Matching Program
Communicate your company’s sense of social responsibility with an internal giving program that matches employees’ charitable donations. It multiplies the impact of giving and promotes teamwork in other areas of corporate life.

Cause Marketing Partnerships
You can enhance your brand image and build customer loyalty with high impact cause marketing programs that speak to your company’s core values, all while delivering water to people in the poorest country in the world.
