Mission and Vision

Wells Bring Hope is committed to drilling wells to bring safe water and effective sanitation systems to rural villages in Niger, West Africa. Our mission is **saving lives with safe water**. According to the 2020 UN Development Index, **Niger is the poorest country in the world** and one of many places where contaminated water kills innocent victims, most often infants and young children.

There is more to this sad story. The burden of getting water falls upon women and girls, who walk back-breaking miles every day to find water and carry it back to their villages. The result? Girls are not able to go to school, and women have no time to work to generate income for their families.

This doesn't have to happen. When we drill a well deep into the ground, lives are transformed instantly and dramatically. Child mortality is reduced by upwards of 70% in areas where we work. Girls receive an education. Women receive microfinance education, start small businesses, and are empowered by their accomplishments and contributions to the community.

They have hope for the future.

Our Story

In February, 2008, Gil Garcetti, former Los Angeles County District Attorney, spoke to a group called Salon Forum, a gathering of women founded by Barbara Goldberg. Inspired by Garcetti's call to action, Barbara went on to form an organization dedicated to raising money to drill wells that would provide rural villages in Niger, West Africa with safe water.

An in-country partner was necessary to oversee the practical, operational aspects of drilling wells in Niger. Based on its extensive experience and expertise in West Africa as well as a proven track record of fully sustainable projects, World Vision (WV) was selected as Wells Bring Hope's partner on the ground.

On July 27, 2010 Wells Bring Hope became a 501(c)(3). It chose to incorporate a highly responsible financial model, directing 100% of all donations to drilling wells, money that is matched dollar for dollar by our partner World Vision.

Why Safe Water?

- Water is the source of all life. Without it, we die. It is a basic human right, something that is owed to everyone on the planet.
- According to the World Health Organization (WHO) "No other humanitarian intervention produces a more dramatic effect on life than access to safe water and sanitation."
- Almost 80% of diseases in developing countries are associated with a lack of clean water. At least 5,000 children die every day from diarrhea alone.

Why Niger?

It is poorest country in the world (U.N. Development Index, 2020)

- 46% of the people earn less than \$1.90 a day
- 64% in rural Niger have no access to clean water
- 94% in rural Niger have no access to improved sanitation
- Life expectancy is 62 years

What We Do and How We Do It

The funds that we raise provide for: the drilling and maintenance of taps for fully mechanized, solar-powered water systems in rural villages in Niger. Through the ongoing work of our partner, World Vision, we are able to educate villagers on sanitation and hygiene, the kind of health information and practice that is essential to improving overall quality of life. WV is one of the largest humanitarian organizations in the world and we have been working with them since we started in 2008.

- With WV's help, we are able to ensure that women and girls receive the kind of education that enables them to thrive and realize their dreams. Girls are able to attend school and women are trained to start their own small businesses so that they are able to contribute to the economic well-being of their families.

We view the drilling of a well as "the entry point," the first step in transforming lives for generations to come. Once a well is drilled and latrines are built, we:

- Continue to work with every village for 15+ years. Using established Area Development Programs, we provide continuing education on sanitation, hygiene, drip farming, and more.
- Educate villagers on how to maintain the well so that it is fully sustainable. We support villagers in establishing a maintenance fund to provide for any repairs that may be needed. In this way, the villagers are able to maintain the well themselves, thereby giving them "ownership" of the well.

We know that providing safe, clean water transforms lives instantly and dramatically. However, there is another essential component in the effort to improve quality of life; people must be educated on sanitation and proper hygiene practices. In villages where we drill, latrines are constructed, and villagers are taught the importance of using them. Before the well is drilled, a committee made up of an equal number of men and women is formed. The committee's sole responsibility is to maintain the well, and they receive education in how to handle malfunctions that may occur and where to go to obtain new parts. A maintenance fund is also established, and everyone in the village contributes a small amount of money to this fund.

We are able to dedication 100% of all donations directly to well projects because Panda Restaurant Group generously underwrites our operating expenses and has since 2014.

The End Result

As a result of this concerted and communal effort, childhood mortality is reduced by upwards of 70% in the areas where we work, and this effect can be measured within the first year of a well's operation. Once a well is drilled, mothers take pride in keeping themselves and their children clean as they realize that the instruction they have received is effective.

When a well is drilled, girls are freed from the daily task of walking 4-6 miles to get water. This enables them to receive an education, something that is crucial if they are to succeed in breaking the cycle of early marriage and early child bearing. Most critically, the chance to attend school opens up new opportunities that previously they had only dreamed of. In addition to the opportunity to attend school, the drilling of a well relieves girls and women of the chronic physical pain and the risk of physical deformity that results from the daily strain of pulling up water and carrying it home.

When women no longer spend hours walking to get water, both their psychological and physical stress levels are reduced significantly. Elimination of these difficult labors results in women feeling better, which promotes greater harmony within the family and the village as a whole.

Another key aspect of this program: educating women on how to start their own small businesses that provide much needed income to their families, improving their overall quality of life. Women experience a very powerful feeling of accomplishment, enhancing their self-esteem. They also serve as role models for their daughters wanting to become "mini-entrepreneurs" just like their mothers.

What Our Supporters Say

"I've been volunteering for WBH for over a year because I have yet to come across an organization that cares so deeply about its mission. This is a group of people who are looking to make a big change by thinking about helping those among us who are the worst off, and yet full of incredible potential. What could be more powerful than saving lives with clean water? On top of that, as a new father I LOVE that this organization doesn't stop at drilling wells, they go the extra mile in empowering women with newfound free time to become intelligent, savvy entrepreneurs and lift the economic spirit of their village."

Kyle M., Volunteer

...I have seen a lot of nonprofit organizations and even more volunteers of NPOs and I have never seen such dedication to helping impoverished women in such a poor part of the world... I don't contribute to the "big" charities but this one is on top of my list.

Lois Z., Donor

I have been involved with this organization as a volunteer for several years and was initially drawn to them by the financial model they offer. 100% of every dollar donated to WBH goes to drilling wells and the modest administrative expenses that WBH has is paid through a grant from a corporation. I had never heard of a model like this so I knew my money would get to the cause. And what a cause! Nothing changes the lives of people like clean water does and in the poorest country in the world, Niger, in West Africa. This organization will keep getting my donation, year after year. Wonderful!

Anonymous, Donor/Volunteer

I LOVE donating to this organization. My business donates 10% to three charities each month, giving each client the option to choose. Wells Bring Hope always responds in such beautiful ways. They do NOT send me letters, with envelopes, asking for more but instead, come from a place of abundance and gratitude, letting me know how my donations have made a difference in people's lives. I love this! Instead of "More! More!" I hear "Thank you." This organization seems to operate from love and abundance and gratitude and that is in line with my mission.

Peggy J., Donor

As a member of the International Monetary Fund's Civic Program Advisory Committee from 2006 to 2012, I reviewed hundreds of requests for grants and therefore, I know well the range of nonprofits' performances and effectiveness...

Since 2015, I have been supporting Wells Bring Hope because it maintains every element that I look for in supporting a nonprofit:

- 1. A clear mission and evidence of progress in fulfilling it.*
- 2. Provision of measurable results*
- 3. Little to no waste*
- 4. Sustainability*
- 5. Opportunity for complimentary programs (economic empowerment for women)*
- 6. A committed team of volunteers*
- 7. Reputable and reliable partners.*

I highly recommend supporting Wells Bring Hope!

Jennifer R., Donor and Former Board Member

Let me preface my review by noting I'm Scottish. We are a people who do not like spending money, and we squeeze every penny's worth of value out of what we do spend. It's what we do. Wells Bring Hope represents that incredible value that I naturally look for. That's why I've parted with money and time for this organization. Your donation grows in impact from the moment it reaches WBH.

Nick B. Donor/Volunteer

I was motivated to join Wells Bring Hope when I attended a presentation by Gil Garcetti on the plight of villagers in West Africa. I was moved by photos of young girls who had to walk many miles, sometimes several times a day, to fetch water. As a result, they could never go to school. I knew almost immediately that I had to do something to help stem this cycle. WBH offered the opportunity to join a number of like-minded folks, and we ARE making a difference!

Anonymous, Donor

Wells Bring Hope is one of the most well-managed and successful organizations I've ever worked with. I've worked with many non-profits over the last forty-two years as a professional fundraiser and board member and this one is at the top of my list.

Jan D., Board Member

Who We Are

Board

Barbara Goldberg, President & Founder

A native New Yorker, Barbara began a very exciting advertising and marketing career on Madison Avenue. She founded Responsive Research, Inc. and spent over thirty years as a marketing consultant, conducting focus groups for Fortune 500 companies, including Bank of America, Coca-Cola, American Airlines, Johnson & Johnson, General Motors, General Mills, IBM, and 3M to name a few. In 1975, she moved to Los Angeles where she continued to work and raise two children. In 1993, she founded Salon Forum, a non-business venture, to bring women together in her home for events that support personal enrichment and connection.

In March of 2008, Barbara and other women of Salon Forum were inspired to start Wells Bring Hope after Gil Garcetti spoke at one of their meetings. She saw WBH as an opportunity to “give back” and so decided to devote her full time to saving lives in West Africa. In January of 2009, she was one of six women who went on a life-changing journey to Niger. She began speaking to community groups and schools to inspire others to take up this cause. She is the mother of two and grandmother of three young girls who live close by.

Lawrence Johnson, Treasurer

Larry has deep executive experience leading established and start-up enterprises. He is the founder and CEO of LR Johnson Associates LLC, a specialty foods distribution and marketing firm. In addition, Larry serves as Director of the Center for Strategic Corporate Development at El Camino College’s Business Training Center.

Previously, Larry provided corporate finance advisory and investment banking services for both Deloitte and Price Waterhouse. Larry is an active Member of the Rotary Club of Manhattan Beach, and has served in a variety of leadership roles in Rotary International's District organization in the Los Angeles area.

He is active in the local Episcopal Church, where he currently serves as a youth leader. A Louisiana native, he is a graduate of Boston College and also has an MBA from Columbia University. An avid golfer, Larry also is an aficionado of the Los Angeles Philharmonic.

Ida Harding, Secretary

A native Georgian, Ida worked as Project Manager for IBM and Federal Contracting Services for 20 years. Prior to that, she was Assistant Dean of Students and Director of Academic Skills Center at two Wisconsin universities.

She has an MBA from the UCLA Anderson School, as well as an MA in English Literature /Linguistics and an AbD in Higher Education, from University of Wisconsin-Madison). She also graduated from the Project Management Institute (PMI) Leadership Master Class and has earned her Project Management Professional (PMP) credential.

She has been an active member and volunteer in PMI for 25 years. She was President of the LA Chapter for two terms and was selected as the PMI Chapter President of the Year for both. Ida joined Wells Bring Hope shortly after its start and has traveled to Niger a number of times, serving as videographer interviewing women.

Jan Doak

Janet Doak has a long history of organizing, fundraising, management and serving on Boards of Trustees. She served for 22 years as Executive Vice President of the House Ear Institute where she managed many volunteer fundraising groups. Before retiring she was elected to House Ear Institute Board of Trustees. She served as President, Los Angeles Chapter of the Association of Fundraising Professionals and was named Professional of the Year in 1998. She previously served on the Board of the United Presbyterian Foundation, the University of the Ozarks, the Dashew Center for International Students, UCLA, and the San Francisco Theological Seminary.

Jan is a graduate of the University of Illinois with a BA in English, where she was Phi Beta Kappa and University of Idaho, where she received a Master of Education. She taught junior high school in Illinois and Santa Monica. She is currently serving on the Board of Trustees of the New Theological Seminary of the West, Mychals Learning Place and is President of the Board of Directors for the University Religious Conference, UCLA.

David Girard

Although he is originally from Minneapolis, David spent much of his childhood on his grandmother's farm. The farm house had no indoor plumbing, and he had to hand pump water from a well. Whether it was 90 degrees or -30, it was David's job to bring water into the house.

Immediately upon graduating from high school, David enrolled at the Aveda Institute for Cosmetology where he graduated with honors. At the age of 19, he moved to Marina del Rey, California where he opened his salon at the age of 20.

In the years since, David has grown his business and now has more than 30 employees. He has also been an international platform artist for Aveda and a motivational speaker, teaching real estate investment to hairstylists. He also served four years as the president of the National Association of Salon Owners.

When David was introduced to Wells Bring Hope in 2011, he felt an immediate connection with the cause because of his childhood years on the farm.

Marsha Hierbaum

Marsha Hierbaum was born and raised in New Jersey and graduated from Upsala College in East Orange New Jersey. Her first job was in advertising in Philadelphia, PA. In 1972, she moved to Los Angeles where she worked as a Branch Financial Analyst for Xerox Corporation.

She married Mark Hierbaum, and in 1980, they started their own company, DML Marketing Group, LTD, located in Van Nuys, California. Marsha retired in 2017, and Mark is still running the business. Marsha is President of the Bel Air Crest Homeowners Association, and serves on many committees for the association.

Marsha and Mark have contributed to many charities but Wells Bring Hope has been a very special charity for the Hierbaum Family and they have been matching donors since 2017. They have one daughter, Stephanie.

Lene Martin

Dr. Lene Martin is the founder and director of the Blockchain at Pepperdine program at Pepperdine University, an academia meets industry initiative providing blockchain courses, certificates, consulting, conferences, and collaboratories for blockchain research and development worldwide. As an adjunct professor, she also teaches blockchain business applications and digital asset analytics at the Pepperdine Graziadio Business School.

Dr. Martin is the founder and CEO of a Malibu consulting company, an entrepreneur and investor of tech startups, an advisor and director of several boards, including the

International Visitors Council of Los Angeles and the International Blockchain Real Estate Association, a published author and international speaker, and a leader in innovative solutions in media and emerging technologies at organizations such as Lockheed Martin Corp., Amgen Inc., and Blockchain Training Alliance.

Dr. Martin also leads the [Work-Life Integration Project](#), a global advocacy initiative focused on the research, publication, and presentation of women's work-life-family experiences, and is the founder and host of its [Breaking Balance Speaker Series](#). She recently co-authored two books on social impact and women's empowerment: [Women in Leadership: Work-Family Integration](#), published by Cambridge Scholars, and [Work from Home: Multi-level Perspectives on the New Normal](#), published by Emerald Publishing.

Dr. Martin holds master's degrees in mass communications and women's studies, a doctorate in organizational leadership, a Ph.D. candidacy in global leadership and change at Pepperdine University, and is the recipient of a Pepperdine University Waves of Innovation grant award. As a Norwegian-American scholar, her research agenda focuses on Nordic leadership models of socio-economic growth and sustainability, specifically the convergence of emerging technology strategies and corporate social responsibility standards.

Eduardo Robles

Eduardo Robles was born in Venezuela as the 11th of 12 siblings. His childhood was challenging due to a lack of financial resources and parents who were not well-equipped to create a loving or peaceful home. Eduardo faced the adversity of his early years by cultivating his imagination and using it to create worlds in his mind that offered an escape from a difficult reality. Discovering the power of creativity at a very early age allowed Eduardo to transform limitations and conflict into opportunity.

At 13, he began working to help his family, and by age 19, he had started his first business painting handmade posters and signs, which earned him enough money to develop his career and open his own graphic design studio. With the unconditional support of a professor, Eduardo himself became a vocational professor, teaching at three well-known Venezuelan universities.

In 2002, Eduardo decided to emigrate to the United States to pursue the American Dream. Here, he took advantage of every available opportunity and has developed a fulfilling career as a graphic artist, author, entrepreneur, and motivational speaker.

Currently living in Marina del Rey, California, Eduardo has spent the last 16 years as CEO of Cre8ions Unique Events, an international event planning company. He is also committed to helping others to activate and nurture their innate creativity, a force that he knows from experience has the power to transform lives.

Carol Rosen

Carol Rosen received a degree from USC in dental hygiene and was engaged in that practice for fifteen years. During that time, which included raising two girls, she developed her passion for cooking, which she turned into a business of custom cakes and catering.

The catering business evolved into event planning—Party Designs by Carol-- for both individuals and corporate entities. As a Certified Special Event Professional (CSEP) Carol enjoyed a fulfilling career and served as the president of several event industry organizations. Notably: The Los Angeles Chapter, International Special Events Society and International President of Wedding Industry Professionals Association. Carol has also been a mentor for many young people just starting out in the field.

Now that she is officially “retired,” Carol has the time to devote to non-profit organizations like Wells Bring Hope and to her family. Carol has lived in Los Angeles her entire life, married for 50 years with two grandsons.

Patricia Vick

Patricia Vick was an employee benefits attorney for over 34 years, and until her retirement at the end of 2018, was a partner in the Law Offices of Shardlow & Vick in Pasadena. Patricia graduated from USC with a BA in history and has an MA in European history from UCLA. She went to law school at night when her younger son Kevin started first grade and received a JD from Loyola Law School.

Patricia has been a member of the Board of Directors of AbilityFirst for 40 years and is a former chair. She has a personal commitment to its work with individuals with developmental disabilities because her older son, George, now deceased, was born with spina bifida. Participation in AbilityFirst's programs, especially his 14 years as a camper at his beloved Camp Joan Mier, tremendously enriched George's life.

Patricia also was a member of the Zonta Club of Pasadena and served as its President. It was at Zonta that Barbara Goldberg first introduced Patricia to Wells Bring Hope. Patricia is a passionate supporter of the mission of Wells Bring Hope and joined the Board in 2018. She is its Director of Strategic Planning. Her retirement plans include more travel and spending time with her three fantastic grandsons.

Gil Garcetti, [Special Advisor to the Board](#)

Gil Garcetti spent 32 years in the Los Angeles County District Attorney's Office, including eight years as Los Angeles County District Attorney. His interest in bringing safe water to the people of West Africa began in January 2001, when he visited West Africa as the guest of the Conrad N. Hilton Foundation. The most startling fact he learned on this trip: roughly 70% of rural villages do not have access to safe water. He made four subsequent trips to West Africa; during those trips, he took the photographs that would eventually become the book "Water Is Key. Since 2006, he has worked tirelessly and successfully to raise awareness and funds to drill wells in West Africa. His life goal is to continue to fund wells to save lives with safe water.

Gil is an internationally acclaimed photographer, having published five photo books since 2002. In the fall of 2007, the UCLA Fowler Museum had an exhibition of his photographs, "Women, Water and Wells." In 2009, many of the photographs that inspired the founding of Wells Bring Hope were on exhibit in the visitors lobby of the United Nations in New York. Gil continues to publish books, and in 2018, published his ninth book of photography, [Protea: The Magic and Mystery](#).

Our Accomplishments in 2021

- In the third quarter of 2021, we transitioned to funding only solar-powered, mechanized well taps. A dramatic improvement over hand pump wells, these fully mechanized wells eliminate the burden of women having to manually pump water. It also reduces the time it takes women to get water, easing their work load.
 - To have unlimited, safe water with the turn of the tap greatly improves the quality of life in these villages, particularly for women, the elderly and the disabled.
 - Our cost of this more advanced technology is just \$6,300 per tap, and increase of just \$200 over a hand pump well.
- In 2021, we funded 33 hand pump wells, 24 taps, and a mechanized water system for a health clinic, which will serve 8,000 – 10,000 people.
- We reinstated our in-person annual fundraiser, with the theme, “Sunday Afternoon in a Japanese Garden.”
 - We limited the number of attendees to 70 fully vaccinated guests and held the event outside in order to follow COVID safety protocols.
 - The event raised funds for 19 taps - \$122,000.
- We held a very successful year-end campaign, which matched the success of last year’s record-breaking effort.
- We received grants totaling \$67,000 from six foundations: the Margaret M. Bloomfield Foundation, the Reed Foundation, the Friese Foundation, the Waters Foundation, the Dame Foundation, and the Red Leaf Foundation.
- We expanded and increased the diversity of the Board of Directors by bringing on three new members – David Girard, Lene Martin, and Eduardo Robles.
- Continued the Well Bring Hope Ambassadors program for high school students throughout the country to teach them how to do community outreach
 - Held two eight-week sessions that featured guest speakers
 - Educated them about the water crisis in West Africa and WBH’s program
- Added 136 new donors and increased the average donation by 38% to \$782.
